This whitepaper is for informational purposes only and does not constitute financial advice or an offer to sell or solicit an offer to buy PierogiCoin (PRG). Investing in cryptocurrencies, including memecoins like PRG, involves significant risk. Always DYOR (Do Your Own Research) and consult independent financial advisors.

PierogiCoin (PRG) is the first Polish memecoin on Solana, combining the humor and flavor of Polish culture with the innovation of Web3. ■ Pierogi – a symbol of tradition, hospitality, and community – now become a symbol of crypto adoption. PierogiCoin is not just another memecoin: a community-driven project, a meme culture platform, a currency for NFT games, and a token aiming for real-world use in gastronomy.

- Entry Barriers → Crypto remains too technical for the average person.
- Dominated by foreign projects → Doge, Shiba, Pepe dominate memes, none reflect Polish culture.
- Lack of Polish community tokens → No project truly uniting Poles around Web3.
- Limited real-world adoption → No bridges to gastronomy, education, or entertainment.

- Education: Make crypto accessible through memes, contests, and humor.
- Community Building: A hub for Poles in Web3.
- Integration with Culture: Bring tradition into Web3 (memes, pierogi, folklore).
- Adoption: Support real use cases in gastronomy and entertainment.

A future where PierogiCoin is recognized worldwide as Poland’s first cultural memecoin – a blend of fun, identity, and innovation.

- Built on Solana SPL Token standard.
- ■ High speed (65k TPS).
- ■ Low fees (fractions of a cent).
- ■ Scalability & ecosystem integrations.
